

Rave-up Tonight

Fear, and Loathing in Las Vegas

All right?
Dancing floor for you is ready
Step on a step
Don't be so shy, shy
Carry on!
Carry on!
Dance with us!
Stomp hard on (the) beat
Let's start together
Dive into the bass drums you hear
This shit is still just a damn warm up, you know
Oh! Let us get high now!
Oh! Let us get extremely high right now!

"Damn it, damn it"
She is still not turning back to me today
I can never be honest to myself
I'm about to give it all up after all
(Give it all up after all)
The day I was waiting for
(It's (the) day I was waiting for)
The moment suddenly appeared
When I stood on that low stage
You were there in the front row of the crowd!

All right?
Dancing floor for you is ready
Step on a step
Don't be so shy, shy
Carry on!
Carry on!
Dance with us!
Stomp hard on (the) beat
Let's start together
I just want to see your biggest smile!
Might seem like a dream, but it ain't, it is here
Oh, yeah! Let us get high now!

There are people inside you just can't deal with
So it ain't easy to gather hearts to one
Ah! Fighting since monkeys
And probably will be the same now on
Still fighting, just like the ancient days
We are still fighting from ages ago

But here, there is a drip of hope
Making big noise
And we come along with the flow of the noise
And we can become one
There is a small little hope
Da-la-la-la, la-la-la
"Dance tune it is"

We have been hitting the floor from the days we were born
(Were born)
Sound will keep changing, but what we do won't change
We have been hitting the floor from when we were born

It's all the same since we were apes
It's all the same since we were apes
