

Another Day on Earth

Feeder

Holding thoughts 'til they transpire
The fear of the great unknown
Choices we make could change the rest of our lives
A blueprint of things to come

Lay beside me
Lay beside me

Another day on earth
Looking forward with open eyes
A sense that we belong
Serenity and calm
Calm

A cold wind blows from the north outside
The rivers are rising high
Darkness falls and the world stands still
There's a silence in the air tonight

Lay beside me
Lay beside me

Another day on earth
Looking forward with open eyes
A sense that we belong
Serenity and calm
Calm

Without you there is nothing
Just the emptiness echo
And the fear of isolation
And a sense that we're alone

Another day on earth
Looking forward with open eyes
A sense that we belong
Serenity and calm
Calm

Serenity and calm

Lay beside me
Stay beside me
