

Dive

Feeder

If you, if you walk with me
Will you take a step with me

We have our ups and down but we're working it out
Topsy turvy towns, will we ever get out
There's so much more to see
We feel the urge to shout, let it all out
Hear our voices now, echoing out
There's so much more to see

If you, if you walk with me
Will you take a step with me
(If you walk with me will you take a step with me)

One look towards the other side, we're working it out
Our minds in overdrive, troubles aside
There's so much more to see
We've had our thrill of compromise, we took and we dived
Our roller coaster lives, centers are high
There's so much more to see

If you, if you walk with me
Will you take a step with me
(If you walk with me will you take a step with me)

If we grow our separate ways
Then we've only got ourselves to blame
It won't feel like it did before
It won't feel like it did before

If you, if you walk with me
Will you take a step with me
(If you walk with me will you take a step with me)
Will you take a chance on me
(If you walk with me will you take a step with me)
