This is feelings that implode
Pulling me apart, out of control
As I fall into despair, fever (fever)

I shook the devil by the hand
Stole the whiskey from the mouth of a broken man
From the ruins, through a town
From the ashes, through a forest across the land

Give us hope, give us love
Give us freedom, give us peace
Hallelujah, sing it back to me if you believe

This is feelings that implode
Pulling me apart, out of control
As I fall into despair, fever (fever)

There's still thoughts I receive
And a voice that carries wisdom in the breeze
As I look to the west
A neon sign is glowing through the trees

Give us hope, give us love
Give us freedom, give us peace
Hallelujah, sing it back to me if you believe

This is feelings that implode
Pulling me apart, out of control
As I fall into despair, fever
There's a reason I must go
To a place where shadows got my soul
As I fall into despair, fever

How could I forget, why would I forget
Think of the alibi, so much for sacrifice
How could I forget, why would I forget
Caught in the eye of a hurricane

I shook the devil by the hand
Stole the whiskey from the mouth of a broken man
Fever, fever

This is feelings that implode
Pulling me apart, out of control
As I fall into despair, fever
There's a reason I must go
To a place where shadows got my soul
As I fall into despair, fever
