

## No Light

Feeder

Fall Out

Trying to breathe in so I can calm down

Settle it, shout loud

Every word you say just brings the knives out

It's cutting in, we fall out

I don't know why its hard to let you go, slip below where there  
's no light

I don't need an explanation, happiness is still what keeps us y  
oung

We just need to find salvation, before we sleep alone and wallow  
in our self regret

Crawl out, the fire once within has faded, burned out

Everything, lights out, lying in a corner as I come round

Settle it, I crawl out

I don't know why, confusion disillusion must we go where there'  
s no light

I don't need an explanation, happiness is still what keeps us y  
oung

We just need to find salvation, before we sleep alone and wallow  
in our self regret

We've come this far and yes, we've made mistakes

Our bones still broken and our bodies ache

It's never felt like this before

I don't need an explanation, happiness is still what keeps us y  
oung

We just need to find salvation, take us to that place where we  
belong

I don't need an explanation, happiness is still what keeps us y  
oung

We just need to find salvation, before we sleep alone and wallow  
in our self regret

Fall Out

Trying to breathe in so I can calm down
