

Veins

Feeder

Here today, gone tomorrow
We're blinded, disillusioned by our own mistakes
Hoping that come tomorrow
The weight we feel is lifted, no more body aches

But some might say
Don't live in ignorance
It's time for change
Something significant

Here tonight
Pulling from different sides
We have all this love to give
Feel the life
It's running right through our body, veins
Veins

We're watching it clouding over
The sound of broken melody playing in reverse
People out on the high street
The traffic riddled city's now about to burst

Some might say
Don't live in ignorance
It's time for change
Something significant

Here tonight
Pulling from different sides
We have all this love to give
Feel the life
It's running right through our body, veins

But we can't keep looking back again
No we can't keep going back
If we hold our heads up high and straight
Then we won't keep looking back
Back

Here tonight
Pulling from different sides
We have all this love to give
Feel the life
It's running right through our body, veins
Veins
