

Who knows about the wind that's coming for us
About the flames turn into fire
About the whispers that we hear
Ooh, together
We should stay together

And we're taking a road that's been giving
We're taking the best we can find
I'm leaving what I won't be missing
We're leaving these stories behind, oh
And we'll wait till the weather gets better
We'll wiggle it off 'cause I know my heart will follow you

Without you
I'm lost
Without you
I'm lost

Who knows that I am all that you remember
I know I've loved you more than I have ever
We know that we've been seeing stars together
Those stars together

Without you
I'm lost
Without you
I'm lost

Ooh, we've been seeing stars together
I just know we are forever
I just know we are forever
