

Background Noise

Felix Cartal

If I could erase everyone before you
I would, I would
I wanna take you everywhere with me
I wish I could, wish I could

You just took my focus made it clear
And ever since that moment need you near
You are all I see and all I hear
When you're with me
Everything else is background noise
And I can't hear a sound except your voice
Everything else is background noise
And I can't hear a sound except your voice
Everything else is background noise

Everything else is background

Crazy how you feel so nice
And I don't usually stay the night
But something bout you feels so right
So I might
So I might

You just took my focus made it clear
And ever since that moment need you near
You are all I see and all I hear
When you're with me
Everything else is background noise

Everything else is background

Everything else is background noise
And I can't hear a sound except your voice
Everything else is background noise
And I can't hear a sound except your voice
Everything else is background noise

When you're with me
When you're with me
When you're with me

Everything else is background

Everything else is background noise

Everything else is background
