

Die B4 You Do

Felly

I hope I die before you do
Now I could never do you dirty
Don't got the slightest without you
Ain't got a lot that got me worried
I hope I die before you do

I wanna live like its 2012
Wanna feel the flames, let me get hell
Need a Nextel, all this clientele
I'm back looking fit no white cell
Shorty wanna flip like buy and sell
Why I gotta lie I was tryin' chill
Stack a few M's on a few L's
Cause that might [?], go to new jails
Motherfuckers say something
Caveman on the line caveman on the line caveman stuck in 2017
Amen to the sensei, all I need
Woke up I posses a part of me
Touch and lust and bust and part the seas
Part of me is still crushed it's hard to believe
She make me wanna switch to R&B
The dick make it hard to leave

I hope I die before you do
Now I could never do you dirty
Don't got the slightest without you
Ain't got a lot that got me worried
I hope I die before you do

I hope I die before you do
Don't wanna be caught up stuck singing blues
All alone in my room sitting beneath the moon
So I got one thing to say to you

Before you do
The moment she bad and she know it
I cut like forequarter and cum like a poet
This weed is a Cutlass, get lost in the motion
But just for a minute, then back to my bullshit
I sleep with an angel, it's good for my omens
How many ya'll cut up, it's more than I told you
I thought this would feel more heroic
But lately I can't shake the loneliness
Call up my homies and smoke that shit
Want a Panamera with a white mirror
When you're right here with my white hair
Through the thick, through the
Through the rain, through the night air
Is this love or a nightmare?
When we fight, we don't fight fair
Keep your guard up and your cards tucked
Run a good bluff, but it's fun and the way I was brought up
I know I tell these songs that it's all love
But who gon' be there when I fall off

I hope I die before you do
Now I could never do you dirty

Don't got the slightest without you
Ain't got a lot that got me worried
I hope I die before you do

I hope I die before you do
Don't wanna be caught up stuck singing blues
All alone in my room sitting beneath the moon
So I got one thing to say to you
