

Interlude

Felly

Drums but other then that when you get into producing and rappi ng and shit weed is fucking just literally just exert emotion

No I mean I know all the theory behind music but

Hayden bro can you turn on the fan for me please

I think equally important

Nah you gotta turn the switch I'm sorry bro

I think equally important is learning how to forget everything you know

Yes but you have to learn everything first

You, I mean you don't have to but, I mean there are great music ians who can't even read music you know

No but you have, I don't mean you have to learn how to read mus ic I just mean you have to learn how to speak the language

Yeah but I think that you just learn from experience

I love putting it like that too speak the language is all you g otta say bro

You have to be able to speak the same language and it depends o n how fluent you are in that language

You know the more skills like you know on an instrument or in a specific aspect the better you can speak that language

And that's the reason we're doing all this music is just to spe ak with other people to reach out to people

It's just communication yeah for real

Oh lord oh lord oh lord can we make it to tomorrow

Yo I went for the Heinekens today fuckin' 20 bucks then I went for the Budweisers they were 13 I was like how do they even sel l anything like who wants to pay 7 extra for like non distingui shable taste maybe its distinguishable I don't really know bro, I gotta piss
