

# Out My Head

Felly

La, la, lala

Just can't get you out my head, my head, my head

Just can't get you out my head, my head, my head

Just can't get you out my head

Big views from a satellite, I chase this feeling every night

The view from my headlights is dark and broke

Confused by my appetite, you show me that I'm bad at life

I had to make a sacrifice and let you go

Hellish thoughts they attach to me

Five blunts speed up, go twice the speed

Hurts worse, when you know just what you need, what you need

Just can't get you out my head, my head, my head

Just can't get you out my head, my head, my head

Just can't get you out my head

La, la, lala

I say I love you, you say I never show

I'm only present when you're coming closer

There's a limit to me, I suppose

No one cares enough to let me know

You say that loves gonna set you free

The same love just won't let me be

You can't hide this right on your sleeve

And you know what you need, what you need

Just can't get you out my head, my head, my head

Just can't get you out my head, my head, my head

Just can't get you out my head, my head, my head

Just can't get you out my head, my head, my head

Just can't get you out my head
