

show me what Im missing

Felly

I woke up singing for the first time In a while
Damn girl, you make me smile
And I'm growing up but I'm still a child
We've come far but we still got miles
Peach smell know its summer time

Windows down Post Road, Old Soul
Feel the Nostalgia when I'm Heading home
If you don't get out this town
I Guess you'll never know
Some things never change
Re-run the episode

Baby
Show me what I'm missing
Make me see things different
Let me into your world

Dispatch playing
And Matt's mixtapes would help me sleep
Now I'm up all night out in these streets
Before I seen your face I couldn't wait til we meet
I was looking for you tell me was you looking for me?

You different, me and you go way back
Long distance
Long hair want your sundress
Gone missing
Back then said I'm all yours
It's no different
Dream girl but it's non fiction, sing

Baby
Show me what I'm missing
Make me see things different
Let me into your world

And I'm just looking I met you
Save me some time on your schedule
Don't be surprised if I think out loud
You're all I can think about (my dream girl)

How many days I wait for a change?
Guess you was all I waited for
24 hours in a day 16 spent awake 8 more
That I'm praying for
You my dream girl I see you in my sleep
Even though it gets deep, don't wait on me
Time's getting short and you know I gotta leave
But please baby girl keep space for me
