On and on with our escape

We're driving out of the city together

Feel the breeze against your face

You touch my hand, a warm embrace forever

If I could freeze this frame

So things won't change

Now that we're here

We feel so alive

We can make this last forever

We can waste time together

Now that we're here

With the sun in our eyes

We can make this last forever

We can waste time together

Leaving all our friends behind

We kidnapped each others minds

I could make you laugh

I could make you cry

And we would find patterns in the sky

Above us

If I could freeze this frame

So things won't change

Now that we're here

We feel so alive

We can make this last forever

We can waste time together

Now that we're here

With the sun in our eyes

We can make this last forever

We can waste time together
