POV

FEVER 333

This black cat infection is spreading mad fast
Look at that, from simple symptoms to hazmat
Don't ask that 'cause stupid questions get laughed at
We clap back then wipe our hands off like "that's that"

Don't keep quiet, just keep rioting to the beat
California caught a fever throwing up the threes
The art of war harbour hate like a reservoir
Bomb first like Makaveli was never gone

Middle finger to the face, that's our point of view
Middle finger to the face, that's our point of view
But every time they tell a lie and they point at you
Middle finger to the face, that's our point of view

So now we running through the city like a marathon
Yeah, that's right, bitch, we brought that firebomb
Teflon- taking lessons from Lethal Weapons
Forever repping a true reflection of our perceptions

You hear the message, so tell me now, are we getting through?
Incarcerate us in cages, they're making revenue
For every time that they tell a lie and they point at you
Middle finger to the face, that's our point of view

Middle finger to the face, that's our point of view
Middle finger to the face, that's our point of view
But every time they tell a lie and they point at you
Middle finger to the face, fuck y'all

Middle finger to the face, that's our point of view
Middle finger to the face, that's our point of view
But every time they tell a lie and they point at you
Middle finger to the face, that's our point of view

We ain't speaking in tongues, shit
But you're tongue tied
What? You're afraid?
Y'all afraid of that?
