

Break the Silence

Fiddler's Green

Remember when
You used to tell me all your secrets

Now and then
It seems to me like this is ending
How can I
Reach out for your hand again
Its hurting me
When I see how you keep love restraint
Dont call me your very best friend
Just when youre locking all your doors
Behind your bars and double locks
You still feel so insecure

And though I hear your distant call
Youre hiding there behind your wall
Still I hear your desperate call
So reach out now I cure it all

Come on now come talk to me
Come on now come talk to me
Come on
And break your silence
Come on now come talk to me
Come on now come talk to me
Come on
And break your silence

We walked along this road together
Something happened on our way
Changes were our following winds
But youre faith in me was blown away
