

Can You Hear Me

Fifth Angel

On and on the war is raging,
On and on it's never changing,
All the rules you made inside your mind,
And in the dark no one can see you,
All alone where no one feeds you,
And all you grasp is slipping through your hands,

You've nothing to say when everything turns gray,
I tried to reach but you're not there,

Can you hear me, am I getting through?
Can you hear me, I'm talking you,
Can you hear me, just a lonely voice in your mind,
Can you hear me alone in my cell,
I was innocent but you left me in hell,
Can you hear me screaming in the night,

I was there when you were born,
I was there kept you from the storm,
But time moved on, you turned and walked away,

Now look inside at the places where you hide,
And tell the truth or say goodbye,

Can you see me right in front of you,
You've been blinded by the things that you do,
Can you see me 'cause I'm looking through you now,
Can you hear me alone in my cell,
I was innocent but you left me in hell,
Can you hear me screaming in the night...

Can you hear me... Can you hear me...

Where is your soul,
Your heart has turned so cold,
AND now you think that life's unfair.
