

Stratosphere

Fight The Fade

I am tired
Of the same old, same old
Need something brighter
To wake up my soul

When the sun goes down
The lights go up
Let's wake up this town
Leave it thunderstruck

When all the dust has settled
And when the smoke has cleared
Yeah, we will still be standing
We'll take tonight
Into the stratosphere

It's been too long
Since we had some fun
Let's blow the roof off, yeah
The party's just begun

When the sun goes down
The lights go up
Let's wake up this town
Leave it thunderstruck

When all the dust has settled
And when the smoke has cleared
Yeah, we will still be standing
We'll take tonight
Into the stratosphere

We are flying
And we trying
To chart a new frontier
Getting weightless
Yeah, our aim is
To break the stratosphere

We are flying
And we trying
To chart a new frontier
Getting weightless
Yeah, our aim is
To break the stratosphere

When all the dust has settled
And when the smoke has cleared
Yeah, we will still be standing
We'll take tonight
Into the stratosphere

Into the stratosphere
We'll take tonight
Into the stratosphere
