

# Cold Heart

Fiji

I left my heart open  
I watched you waste it like that bottle of wine that you poured me  
Left it on the same damn floor  
Where you took it all, before you explored me  
Our clothes on the ground  
You knew I was down and out  
And yet you pursued  
Now I'm tryna pick up the pieces  
From those broken shards that you knew you shattered

Oh, how it hurts so bad  
It's gonna take some time to recover  
How it hurts so bad  
Just look what you've done to me lover  
Mmm, oooh

Now I've got a cold, cold heart  
Only you can make it that way  
My poor cold, cold heart  
Some things you make me believe and say  
Gotta get over you  
I gotta get over you  
This won't be the end of me  
Yes I'ma be alright so please let me be

Love was the hardest of lessons for my foolish heart  
You ever learn  
I thought what we both had was fire  
Instead it was me that fell on the burn  
But my soft heart will always forgive but will never forget  
So easily  
That sweet smile that continued to lie  
I never saw what you were doing to me

And oh, how it hurts so bad  
It's gonna take some time to recover  
How it hurts so bad  
Just look what you've done to me lover  
Mmm, oooh

Now I've got a cold, cold heart  
Only you can make it that way  
My poor cold, cold heart  
Some things you make me believe and say  
Gotta get over you  
I gotta get over you  
This won't be the end of me  
Yes I'ma be alright so please let me be  
Cold, cold heart  
Only you can make it that way  
My poor cold, cold heart  
Some things you make me believe and say
