

Nothing

Fiji

Young wise man warned me they told me that
Only fools rush in
But I've been stupid, dumb and blind
I should've just taken my time
'Cause I fell in love with every lie
That you wished for
Shoulda seen signs that you never
Really cared (really cared)

But it wasn't all bad, no we had good times too
But like too much alcohol consumed
It never ends well
And my hearts hungover now
The only remedy
Is some good old fashion love and affection from you

So I call
At two in the morning saying, "Come back to me please"
Even though I know you'll just break my heart again
Please just another minute
Even a moment, baby that's all that I need
Then we can go back to the way that it was
Where you are my all, and I'm your nothing
Oh, nothing
Heey, noo, oh

I often wonder how we keep going in and out
You keep leaving me in doubt
There I am back all alone
My remedy is just another shot or two
Wishing maybe you'll come through
And I'm feeling like a fool, mm
Maybe without this vices I'll be better then
You'll find me attractive again
Like I was your best friend
Now I'm just holding on to all the memories
When I took you in with me
And we were so wild and so free

So I call
At two in the morning saying, "Come back to me please"
Even though I know you'll just break my heart again
Please just another minute
Even a moment, baby that's all that I need
Then we can go back to the way that it was
Where you are my all, and I'm your nothing

So I call
At two in the morning saying, "Come back to me please"
Even though I know you'll just break my heart again
Please just another minute
Even a moment, baby that's all that I need
Then we can go back to the way that it was
Where you are my all, and I'm your nothing
