

# Promise

Fiji

Is there a chance I could talk to you  
Is there a time I could walk you home  
Would it be okay for me to pick you up  
Is there a place where we can be alone

Staring at your picture on the mirror  
Wondering if you're all alone  
Waiting for my call, will you answer  
Or will it be your voice saying you're not home

These are the thoughts going through my mind  
When all I can think about is you and me baby  
Why can't you see the love that I have for you  
Is simply driving me crazy  
All of the time to share  
Going in and out of love with you lady  
How can we promise each other love

Give me the chance and I promise (I promise)  
Baby give me the chance and I promise (You know this)  
Give me the chance and I promise  
Baby baby give me the chance and I promise

I know it's a dilemma as I live and breathe  
Baby girl I will deliver  
Promise you'll never push me to the side, oh no  
We two invested in this love together we'll grow grow grow grow

These are the thoughts going through my mind  
When all I can think about is you and me baby  
Why can't you see the love that I have for you  
Is simply driving me crazy  
All of the time to share  
Going in and out of love with you lady  
How can we promise each other love

From this moment I will promise you my love, baby girl  
I will forever give you all of my time, and you  
You will always have my heart no matter what  
And our kids will know the depth of our love

These are the thoughts going through my mind  
When all I can think about is you and me baby  
Why can't you see the love that I have for you  
Is simply driving me crazy  
All of the time to share  
Going in and out of love with you lady  
How can we promise each other love

These are the thoughts going through my mind  
When all I can think about is you and me baby  
Why can't you see the love that I have for you  
Is simply driving me crazy  
All of the time to share  
Going in and out of love with you lady  
How can we promise each other love

I said I promise I love you more
