

Glimpse

Finger Eleven

Tell me what you need to hear and i'll tell it to you again
i can fake it all if you can too
will it stop from bleeding naturally enough
can i hold my tongue in silent the words are slow and repeating
i know you why don't you take what you need and then go away
i know you why don't you take what you need

Die to get another glimpse in
so i'll watch the water rinse
until we all get washed away
i never needed someone comforting me

I don't think i told you how i feel tonight
you perfect little angel your beautiful even now
i know you why don't you take what you need and go away
i know you why don't you take what you need

Die to get another glimpse
so i'll watch the water rinse
until we all get washed away
i never needed someone comforting me
down i go
