

# Timebomb!

[Finish Ticket](#)

It's lonely in this drink  
I'll make the ice cubes go round  
It helps the poison go down  
The path I had was clear  
And I was on a straight line  
And I was getting out of here, here, here

I guess it's just the way I am  
Always seem to fuck it up  
Am I overthinking it?  
Or has the damage now been done  
I know that I could shrug it off  
But then I go and self destruct

Oh, I'm just a time bomb

So meet me for a drink  
Let's have a conversation  
Fighting our temptations  
It's all that we have left  
When the love has run dry  
And now I'm wasting my time, time, time

I guess it's just the way I am  
Always seem to fuck it up  
Am I overthinking it?  
Or has the damage now been done  
I know that I could shrug it off  
But then I go and self destruct

Oh, I'm just a time bomb  
Oh, I'm just a time bomb, yeah, yeah  
...
