

Be Free

Fire From The Gods

I don't feel quite that normal
Life has been a bit strange
Like I forgot my face
Like I forgot my name
Feel like we lost all grace
Something different about this place
All hope abandoned
Left without a trace

Feel like my body's a shadow
An angel brought so low
I got no path to follow
Soul of the earth hollow
Still caught up in the rat race
Nothing changes in this place
All hope abandoned
Left without a trace
Open mouth but they make no sound
Begging to be free

So let go
And just breathe
Live again and be free
So let go
And just breathe
Live again and be free
Just be free

They're calling this the new normal
On a high but still so low
There's something so wrong I know
The truth so hard to swallow
On a high living in disgrace
Feeling different about this place
All hope abandoned
Left without a trace
Open mouth but they make no sound
Begging to be free

So let go
And just breathe
Live again and be free
So let go
And just breathe
Live again and be free
Just be free

Let it go
Let it go
Let it go
Let it go

Let 'em go
Let 'em go
Let 'em go

So let go

And just breathe
Live again and be free
So let go
And just breathe
Live again and be free
Just be free
Just be free
Just be free
