Fire From The Gods

I and I
I and I
Scream from the mountain
Please come save us
I and I
I and I
I will wipe away your tears
Mumma don't cry
Oh I, oh I
Will light the fire in these trying times
I and I
I and I
Will lead the way in the dying light

Armed and dangerous
Oh look boy this is fire, don't play with this
Notorious
I am motherless
Just another inglorious bastard
Screaming blood and thunder
Blood and fire
Turn the world upside down upon it's head
Spinnin' it round and round
Killin' ourselves
Livin' in hell
Hands down with more bodies in the ground
Hands tied behind our back
Knowledge under attack
Blindly obey
Rally round your flag

Glock trained on your neighbor
Legal murder for your savior
Glock trained on your neighbor
And we still won't change

I and I
I and I
Scream from the mountain
Please come save us
I and I
I and I
I will wipe away your tears
Mumma don't cry
Oh I, oh I
Will light the fire in these trying times
I and I
I and I
Will lead the way in the dying light

I got this need to tell my people not to let it go
And keep up the pressure
Turning our pain into hurricanes
Drowning these demons
We living in terror
Driven insane and the violence sustains
The blood in the streets and the gutter

Living in horror
We never do better
Addicted to killing each other

Round and round
It's a circus, we're all clowns
Hellbound
Nobody safe from these rounds
No time to bite back
For every bullet you got in your mag
There's millions plus me to counter-react

Glock trained on your neighbor
Legal murder for your savior
Glock trained on your neighbor
We're still living a lie

I and I
I and I
Scream from the mountain
Please come save us
I and I
I and I
I will wipe away your tears
Mumma don't cry
Oh I, oh I
Will light the fire in these trying times
I and I
I and I
Will lead the way in the dying light
