

# Make You Feel It

## Fire From The Gods

Imma make you feel it  
Imma make you feel it  
Imma make you feel it

Imma make you feel it  
Imma make you feel it now

Imma make you feel it deep inna your soul  
Imma get you clapping, Imma make you feel whole  
With this verbal slappin, Imma give you that gold  
Give that fat ignorant head a little lipo  
You psycho fall back  
Why you so hype though  
But on the real  
Why you so hype though  
Sit back and let me operate  
Let me pull out my knife and dissect the hate  
Let me break it down to the basics of life  
This is how we will survive  
Don't fall for the bullshit and don't fall for the hype  
Open your eyes  
Let me break it down to the basics of life  
This is how we will thrive  
Now we got to rise  
Elevate your mind  
Open your eyes

Cut through the madness in these dark times

Imma make you feel it  
Make you open up your eyes  
Imma make you feel it now  
Turn the darkness into light

Tryna help my people rise out of depression  
Tryna give these youths a little future and direction  
Keep their mumma smiling try and save her from the hurt  
Tryna keep these youngins from the bullets and the hearse  
I read the news today  
Another hundred dead and all you want to do is pray  
Thoughts no solutions, they  
All become pieces in the blame game

Wake up in the morning and my minds on a new grind  
Wake up in the morning and I'm tryna breathe new life  
Cut through the madness of these dark times

Imma make you feel it  
Make you open up your eyes  
Imma make you feel it now  
Turn the darkness into light

Imma make you feel it  
Make you open up your eyes  
Imma make you feel it now  
Turn the darkness into light
