

## Autumn Rain

## Firefall

In the air  
There's nothing but despair  
And now it's growing, and it's changing, and it's turning into  
a storm  
And the rain will fall

And all the trees  
Are crying under lightning and I can see  
That the ground is begging for more  
The Mechanix of Fall

The Autumn rain now falls  
The Autumn rain now grows  
The Autumn rain, it flows

The Autumn rain now falls  
The Autumn rain now grows  
The Autumn rain, it flows

Behind the clocks  
The walls are cracking wide and time is fading out  
And the lights are swallowed by fear  
And it all goes dark

Everywhere  
Decay is taking over, and the rain that falls  
Feels like waging a war  
The Mechanix of Fall

The Autumn rain now falls  
The Autumn rain now grows  
The Autumn rain, it flows

The Autumn rain now falls  
The Autumn rain now grows  
The Autumn rain, it flows

The Autumn rain now falls  
The Autumn rain now grows  
The Autumn rain, it flows

The Autumn rain now falls  
The Autumn rain now grows  
The Autumn rain, it flows
