

Before I Met You

Firefall

Before I met you, the sky didn't seem so blue
I wondered why I was always walking uphill
Before I met you, I knew I didn't have a clue
Dancing around the holes in myself, I needed help to feel

How was I to know
You'd find me soon and you'd love me so?

Before I met you, only my heart knew
Before I met you, in my dreams
I knew you'd find me, it was a certainty
I really knew, before I met you

Before I met you, my heart was a lonely place
It wanted to fly but never got off the ground
And then I met you and my dreams became your face
Together, we fly now on new wings, never to come down

How was I to know
You'd fill me up when you'd love me so?

Before I met you, only my heart knew
Before I met you, in my dreams
I knew you'd find me, it was a certainty
I really knew, before I met you

You know I hate to think what I would've become
Without you here by my side
It was a Saturday in the heat of summer
I blessed the day that you arrived

I knew that I didn't know
You'd fill me up when you'd love me so (love me so)

Before I met you, only my heart knew
Before I met you, in my dreams
I knew you'd find me, it was a certainty
I really, really knew, before I met you
Before I met you
Before I met you
