

I Believe You

Fireflight

Do you hear every demon calling your name?
I hear them too
No medicine strong enough to escape
I feel it too

Nightmare, parade
Each memory holds the taste
The bitter never fades
I've stood your ground
Felt everything crumble down
Hear me when I say

You're not the only one
Wondering is this worth it all
Not the only one
Begging for a miracle
Everyone thinks you're crazy
When you're saying that
The whole world's out to get you
But I believe you
I believe you

Every fear like a fever deep in your veins
It's burning me too
Paranoid as they watch every move that you make
They're watching me too

Nightmare, parade
How much more can you take?
Hear me when I say

You're not the only one
Wondering is this worth it all
You're not the only one
Begging for a miracle
Everyone thinks you're crazy
When you're saying that
The whole world's out to get you
But I believe you
I believe you
I believe you

You're not the only one
Wondering is this worth it all
You're not the only one
Begging for a miracle
Everyone thinks you're crazy
When you're saying that
You're not the only one
Wondering is this worth it all
You're not the only one
Begging for a miracle
Everyone thinks you're crazy
When you're saying that
The whole world's out to get you
But I believe you
I believe you
