

# Longing to Know You

Firewind

I still remember  
When I look back to that day  
I opened the letter  
And it was hard to believe  
That the path to the stars was my way

One in a million  
Will have that feeling in life  
Twisted emotions  
This journey will change everything  
But the price is so hard to pay

All these stars  
Shine for you  
Sending out my love  
All the stars  
Leading me through  
I can't wait  
I'm longing to know you

This is the moment  
The world seems so far gone  
I see you smiling  
But it is still on a screen  
Soon I will hold you, my son

I'm looking forward  
To telling you all that I saw  
Magical moments  
I will not miss anything  
On that day when we will meet

All these stars  
Shine for you  
Sending out my love  
All the stars  
Leading me through  
I can't wait  
I'm longing to know you  
Longing to know you

All these stars  
Shine for you  
Sending out my love  
All the stars  
Leading me through  
I can't wait

All these stars  
Shine for you  
Sending out my love  
All the stars  
Leading me through  
I can't wait  
I'm longing to know you
