

Salvation Day

Firewind

With news of blood I start the day
Who ever wanted it this way?
Insurrection pain and more disaster
Is the only guarantee we have

We lose it all
No dignity
The future's shattered
The mighty fall
If we can hold out
We will rise again

Fight!
There is no fair warning
Alight!
From this torture ride
Scream in the night
Can't you hear us calling?
Out of the dark, into the light
For a salvation day

They won't be coming home today
So many souls that went astray
Disappointment, rage and revolution
Will there be justice for us all?

We lose it all
No dignity
The future's shattered
The mighty fall
If we can hold out
We will rise again

Fight!
There is no fair warning
Alight!
From this torture ride
Scream in the night!
Can't you hear us calling
Out of the dark, into the light
For a salvation day

Fight!
There is no fair warning
Alight!
From this torture ride
Scream in the night!
Can't you hear us calling
Out of the dark, into the light
For a salvation day

Fight!
There is no fair warning
Alight!
From this torture ride
Scream in the night!
Can't you hear us calling

Out of the dark, into the light
For a salvation day
