

## State Of Mind

Fish

I don't trust the government, I don't trust alternatives  
It's not that I'm paranoid, it's just that's the way it is  
Every day I hear a little scream inside  
Every day I find it's getting louder  
I just want to reach out and touch someone  
'Cause I find I need a friend in this dark hour

We the people are gettin' tired of your lies  
We the people now believe that it's time  
We're demanding our rights to the answers  
We elect a precedent to a state of mind

I trust in conspiracies, in the power of the military  
In this wilderness of mirrors here, not even my speech is free  
Every day I hear a little scream inside  
Everyday I find it's gettin' louder  
I just want to reach out and touch someone  
'Cause I find I need a friend in this dark hour

We the people want it straight for a change  
'Cause we the people are getting tired of your games  
If you insult us with cheap propaganda  
We'll elect a precedent to a state of mind

Every day I hear a little scream inside  
Every day I find it's getting louder  
I just want to reach out and touch someone  
'Cause I find I need a friend in this dark hour

When we the people have our backs to the wall  
Do we the people then assume control?  
When it's too late to stop our own execution  
When we're faced with the final solution  
You can't elect a dream revolution  
When you've a bullet in the back of your mind

It's just a state of mind
