

Restore Me

Fistful Of Mercy

You dream a lot about yourself
And you dream hard winds upon your friends
But you wanna kill the beast
That lives up in your head
And you wanna kill the beast
That lives to see you dead

You dream a lot about the past
And you dream that's it's never gonna last
So you wanna give your love to your sister and your friends
And you wanna give your love to the one who's facing the end

You want it all but you've got to give
You want it all but you've got to forgive

Restore me, restore me now and make me sane
Restore me, restore me now I got to give up your ghost

You make me lonely

You want it all but you got to give
You want it all but you got to forgive

You dream a lot about the past
And you dream that it's never going to last
