

Say Goodbye

Five Star

Baby, you and I
Have shared some moments that will never die
You said you would try to make me happy
But love for you and I will never be the same

So I just want you to say goodbye
Before you walk out and make me cry
No need for a second chance
'Cause you'll only just break my heart
All over again
All over again

I wish you were here
To melt away my tears and fears, my dear
Now my head is gone
And changed it's mind again

So I just want you to say goodbye
Before you walk out and made me cry
No need for a second chance
'Cause you'll only just break my heart
All over again
All over again

You have always tried
To treat me right, I know
Things just cannot work out
So you'll just have to go

So I just want you to say goodbye
Before you walk out and made me cry
No need for a second chance
'Cause you'll only just break my heart
All over again

So I just want you to say goodbye
Before you walk out and made me cry
No need for a second chance
'Cause you'll only just break my heart
Want you to say goodbye
Before you walk out and made me cry
All over again
