

Everyday

Five

Every day, I got you on my mind
Every day, I just keep it all inside

You got me tripping
Because I want you bad and you don't know
But if you give me a chance, oh baby, we'd find romance
Come and tell me, are you ready to go?
You got me tripping, now baby, tell me what I gotta do
'Cause when I'm laying in my bed, and you pop into my head
All I wanna do is get with you

Every day, round and round
I think about the times and the love I've found, oh baby, baby
Every day, round and round
My head is in the clouds and it won't be coming down, oh baby, baby

Every day, I just can't find the time
I just wanna say, a girl like you is hard to find

You got me tripping
Because I want you bad and you don't know
But if you give me a chance, oh baby, we'd find romance
Come and tell me, are you ready to go?
You got me tripping, now baby, tell me what I gotta do
'Cause when I'm laying in my bed, and you pop into my head
All I wanna do is get with you

Every day, round and round
I think about the times and the love I've found, oh baby, baby
Every day, round and round
My head is in the clouds and it won't be coming down, oh baby, baby

Well there she goes again, running circles round my mind
Yeah, I know just what you're saying, but you know the girl is mine
Well maybe I can get her, if I show her what I got
What you got? I got double, c'mon give it a shot
You tryna take my girl, tryna mess around with Mrs. Right
No, but how can I be happy, when I dream of her at night
There she is up in my head, every time I close my eyes
So I think I'm gonna call her, just to see if she replies

You got me tripping
Because I want you bad and you don't know
But if you give me a chance, oh baby, we'd find romance
Come and tell me, are you ready to go?
You got me tripping, now baby, tell me what I gotta do
'Cause when I'm laying in my bed, and you pop into my head
All I wanna do is get with you

Every day, round and round
I think about the times and the love I've found, oh baby, baby
Every day, round and round
My head is in the clouds and it won't be coming down, oh baby, baby
Every day, round and round
I think about the times and the love I've found, oh baby, baby
Every day, round and round
My head is in the clouds and it won't be coming down, oh baby, baby
