

## A Good Start

Fivefold

I believe we can find a way  
I believe we can find a way

It's all we're talking about  
All this freedom  
While we are fighting  
Amidst our own  
It's all I'm dreaming about  
Is this vision  
Where everyone just gets along

Well I'm not impressed by the words they say  
This perfect world isn't holding any weight  
So impressed with the sides we take  
Well I believe we can find a way

When all of our lives  
We spend looking up to the stars  
As if they will put an ending to this fight  
Facing the problem is a good start

It's all I'm hearing about  
This division  
Separated by what we think  
So good with shouting out  
Our opinions  
Afraid to listen  
To our mistakes

Well I'm not impressed by the words they say  
This perfect world will collapse under the weight  
When we stand as the human race  
Well I believe we can find a way

When all of our lives  
We spend looking up to the stars  
As if they will put an ending to this fight  
You see the problem is that all of our lives  
We've grown farther away from the heart  
When it's the only thing to get us through the night  
Facing the problem is a good start

When all of our lives  
We spend looking up to the stars  
As if they will put an ending to this fight  
You see the problem is that all of our lives  
We've grown farther away from the heart  
When it's the only thing to get us through the night  
Facing the problem is a good start
