

## Distance Between

Fivefold

A light goes out on a busy street  
Rain falls down, can't get no sleep  
Four days and I already miss you  
I thought love was just a fairy tale  
But now I'm here and you're somewhere  
Wondering when I'm coming back to you

Out here I can't see the sun  
Can't find anyone who's quite like you

There's a distance between you and me  
But I swear I'm never gonna be this far away again  
And the city lights promise me all I ever dream  
But all I ever dream of is you

Another mile away and I'm stuck out here  
By now I'd say you're probably praying  
"Dear God, bring him home"  
But there's nothing I can do to take back the time  
That we lost when I sought out to find myself  
But now I need you

Cause out here I can't see the sun  
Can't find anyone who's quite like you

There's a distance between you and me  
But I swear I'm never gonna be this far away again  
And the city lights promise me all I ever dream  
But all I ever dream of is you

It's of you  
It's of you  
It's of you

And it's not like me to say this  
But I think I have to say this  
I'm in love with you  
I'm in love with you

I said it's not like me to say this  
But I think I have to say this  
I'm in love with you  
I'm in love with you

Out here I can't see the sun  
Can't find anyone who's quite like you

There's a distance between you and me  
But I swear I'm never gonna be this far away again  
And the city lights promise me all I ever dream  
But all I ever dream of is you

There's a distance between you and me  
But I swear I'm never gonna be this far away again  
And the city lights promise me all I ever dream  
But all I ever dream of is you

A light goes out on a busy street  
Rain falls down, can't get no sleep  
Four days and I already miss you
