

Too Late

Fivefold

Don't talk about it
We're too late for this
What I need now is something
You could never give
And I still remember cold December
Mother's crying out loud
Praying somehow
You'll turn back around

So don't talk about it
By now I'm far too late
Don't try to fix this
Emptiness in me
Now that you're gone
I don't feel a thing
Yeah I'm used to it
You leaving me alone

And was it my fault
Am I the one to blame
Or was this your plan
To leave us empty handed and alone
And don't you say you love me
'Cause you don't even know me
Seems like these days
I don't even know myself
Oh no

So don't talk about it
By now I'm far too late
Don't try to fix this
Emptiness in me
Now that you're gone
I don't feel a thing
Yeah I'm used to it
You leaving me alone

So hard to say goodbye
But you won't see me cry
When you slammed the door
You turned your back on me
If I could turn back time
Would you change your mind
When you finally see what you missed

When I talk about it
And by now I'm far too late
Don't try to fix this
Emptiness in me
Now that you're gone
I don't feel a thing
Yeah I'm used to it
You leaving me alone

Oh no, no, no
So don't talk about it
You leaving me
