## **Fallen Alien**

**FKA twigs** 

I was waiting for you, I was outside Don't tell me what you want because I know you lie (I feel) I was waiting for you, on the outside Don't tell me what you want because I know you lie (I feel, the light )

I was crying for you, on the outside Don't tell me what you want because I know you lie I'm a fallen alien I never thought that you would be the one to tie me down But you did In this age of Satan I'm searching for a light to take me home and guide me out

In the blazing sun I saw you In the shadows hiding from yourself When the lights are on I know you See you're grey from all the lies you tell

Now you hold me close so tender In the shadows hiding from yourself When the lights are on I know you See you're grey from all the lies you tell Now you hold me close so tender When you fall asleep I'll kick you down By the way you fell I know you Now you're on your knees (I feel, the lightning blast)
