

# The Greatest

Flame

He the greatest  
I mean really the greatest  
Nobody compares to Him  
That's why I love Him

So many flavors come and taste it  
Get wasted faded overrated  
But then they say my God is dated  
My generation is so jaded  
In sinking sand don't place your hope  
Put trust in man a slippery slope  
Cause all that stuff will bring you down  
That's why we stay looking up  
Cause you stay true, you all real you graceful  
We thank you for faithful love  
That you lavished on us  
We been fans of all the things you paid for for us  
Man whats the latest? God is still the greatest

Don't place hope in this world system  
Classism racism ain't that much different  
Don't place all hope in politicians  
Cause they can make a promise then go outta commission  
You making plans you making friends  
Then you find out later they ain't really your friends  
Cause all these people can let you down  
And you know it's true you thought it was permanent now they act like  
they don't notice you  
But when people determine to turn on you with no concern for you like  
you disposable  
You get emotional this world can be brutal might even blackball you then  
misconstrue you  
Twisting the truth make me do something to you  
That's why we stay looking up  
Cause you stay true you all real you graceful  
Thank you for faithful love  
That you lavished on us  
And we're fans of all the things you paid for for us  
What's the latest? God is still the greatest

I might sound like a broken record  
But ain't nobody broke His record  
Forever faithful never reckless  
I know  
I might sound like a broken record  
But ain't nobody broke His record  
Forever faithful never reckless  
I know
