Be Free, A Way

Flaming Lips

Did good, baby So we can go The time right now Thing is The sun shines now But we're so alone It's not, tis not The light That shines The way, away My heart can beat Be free and go Our days Are empty Is the love the god That we control? To try to trust The pain The sun shines now But we can't see Its light lights now We live The same Be free, away But how can we Find ours to hold? A place (2x) A place away Away Away Away Away
