

Burned Out Flame

Flatland Cavalry

Is it ever worth it, looking backwards?
Digging into scars of wounds of yesterday
'Cause ever since you said you're leaving
My heart stopped beating and my world turned to gray

But you can't find fault when there ain't no one to blame
You can't lose out when you both give up the game
You can't make someone feel loved when you call their name
Just like you can't find your way in the dark with a burned-out flame

Our weary souls are a worn-out matchbox
Tryna light a fire in the pourin' rain
We've been holdin' these dying embers
When we both know that there's nothing left to say

Yeah, you can't find fault when there ain't no one to blame
You can't lose out when you both give up the game
You can't make someone feel loved when you call their name
Just like you can't find your way in the dark with a burned-out flame

You can't find fault when there ain't no one to blame
You can't lose out when you both give up the game
You can't make someone feel loved when you call their name
Just like you can't find your way in the dark with a burned-out flame

Yeah, you can't find your way in the dark with a burned-out flame
With a burned-out flame
