

## Bleed Red

Flaw

See the same old faces but inside you know they lie  
See familiar places but they try, and they try, and they try  
Separate the races with no reason as to why  
No more... no prejudice!  
Right!

We're calling out all those minds  
Flagrantly 'cause we will never pacify  
There's always something inside us  
Separated by our own eyes  
There's no way our consciences  
Will let your indecency just wander by  
We're no longer restrained  
By your head games!

Don't we bleed the same color red?  
Don't we feel the same pain engraved?  
Don't we bleed the same color red?  
Don't we feel the same pain?

Take a look inside your mind and see what you can find  
A look inside your mind and see what you will find, yeah  
Take a look inside your mind and see what you can find  
Can't you see? We all bleed red!

You act just like if  
As though we've been given something  
Yeah, to make it all seem right  
A way to brush it aside  
Change the facts all around now  
There's only one fight  
Strong enough to make those bastards just run and hide  
It's called equality pride  
Makes us real men!

Don't we bleed the same color red?  
Don't we feel the same pain engraved?  
Don't we bleed the same color red?  
Don't we feel the same pain?

Take a look inside your mind and see what you can find  
A look inside your mind and see what you will find, yeah  
Take a look inside your mind and see what you can find  
Can't you see? We all bleed red!

We all bleed red now  
We all bleed red

Take a look inside your mind and see what you can find  
A look inside your mind and see what you can find, yeah  
Take a look inside your mind and see what you will find  
A look inside your mind and see what you will find, yeah  
Take a look inside your mind and see what you will find  
A look inside your mind and see what you will find

I know we bleed the same color red  
I know we feel the same pain engraved

I know we bleed the same color red  
I know we feel the same pain

Come on!

Take a look inside your mind and see what you can find  
A look inside your mind and see what you can find, yeah  
Take a look inside your mind and see what you can find  
Can't you see? We all bleed red!

We all bleed red now  
We all bleed red
