

Voices

Flaw

Been down for so long now
How has it come to this
Don't know if I can make it out
So much that I have missed
The cold and broken soul
It seems to bring me down
Because I long to still be whole
Take away all the other hurt around

The hurt around
It brings me down
So far now, don't know if I will make out
Feel the wind blow
And I hear the voices in the air
I know you're there
What I didn't know, was all the things you did
Because you really care

I don't know if I can make it out (2x)

I wish I could see you there
Same person that I use to know
It's too much for a soul to bear
Come to terms with why you had to go
