

Wake Up

Flaw

We stand up for the flag
You know we always have her back
We stand up for the flag
You know we always have her back

What has it come to these things that happen everyday
I've never seen such disrespect, it needs to go away
There's no excuse to ever say the things that people say
We defend this nation with our lives regardless come what may

We stand up for the flag
You know we always have her back

These days are troubling least to say
How did we end up this way today
Our country tis of thee I will say
It's time to wake up, it starts today

There's no excuse for this the dereliction is insane
Nothing good can come of this, and people need to use their brain
I've never seen this much deception and a cause of pain
We've got to fix it and make all of us one and the same

We stand up for the flag
You know we always have her back

These days are troubling least to say
How did we end up this way today
Our country tis of thee I will say
It's time to wake up, it starts today

We stand up for the flag
You know we always have your back

We're standing tall and we respect the fallen every day
Hand over heart we show our love in every single way
Our stars and stripes under attack no matter what they say
We've got her back our love of country never goes away
This disrespect is so disheartening, it's time to go
Making all your references there's something you will never know
Just what it takes how hard it breaks to give it all you got
Time to face the music were not backing down I kid you not

We stand up for the flag
You know we always have her back

These days are troubling least to say
How did we end up this way today
Our country tis of thee I will say
It's time to wake up, it starts today (We stand up for the flag)
These days are troubling least to say (You know we always have her back)
How did we end up this way today (We stand up for the flag)
Our country tis of thee I will say (You know we always have her back)
It's time to wake up, it starts today
