

## A World Beyond

Fleurie

Out where the signals crossed  
Somehow the truth got lost  
We were meant for such great heights  
Weight tied around your feet  
While I floated off the street  
No chance to say goodbye

But I feel your heart through the atmosphere  
The message shows and then it disappears  
Oh sometimes we're meant to go alone  
Oh there's a world beyond the world we know  
A world beyond the world we know

The world feels far away, When you're up in outer space  
Don't know which way to reach  
If I had the words to say, I'd send them straight away  
Can't find a frequency

But I feel your heart through the atmosphere  
The message shows and then it disappears  
Oh there's a world beyond the world we know  
A world beyond the world we know  
Feel your heart through the atmosphere  
The message shows and then it disappears  
Feel your heart through the atmosphere  
The message shows and then it disappears

Like a lone balloon caught up in the power lines  
Tangled up in everything you thought was right  
Can you hear my heart calling from a satellite?  
Can you hear me now, screaming at the speed of light?
