

Make The First Move

Fleurie

Oh do you wonder
Why I hide behind my hair when you're walking by?
Give me a reason
I wanna tell you how I feel but I'm feeling shy
And baby you look so cool every time we talk
Maybe I'm crazy for thinking it's something more

I want you to make the first move
Make the first move tonight
I want you to make the first move
Make the first move tonight
In my dreams you're calling me baby
I think you're the one who could save me
I can't stay away
But I want you to make the first move
Make the first move tonight

Could you imagine
Just running away and waking up more alive?
And do you ever
Dream about going places where nobody has to hide?
'Cause baby you look so cool every time we talk
Maybe I'm crazy for thinking it's something more

I want you to make the first move
Make the first move tonight
I want you to make the first move
Make the first move tonight
In my dreams you're calling me baby
I think you're the one who could save me
I can't stay away
But I want you to make the first move
Make the first move tonight

Tell me I'm the one you want
Make the first move, make the first move tonight
Tell me I'm the one you want
Make the first move, make the first move tonight

I want you to make the first move
Make the first move tonight
I want you to make the first move
Make the first move tonight
In my dreams you're calling me baby
I think you're the one who could save me
I can't stay away
But I want you to make the first move
Make the first move tonight
