Wait & See

Flight Facilities

You could say I'm not in love
With anyone but you just occupy my mind
And you could say it's not enough
But I'm one to try when it comes to chasing light
All this time we're waiting to see, it feels obsolete
Now just lettin' it breathe to let you in
I don't wanna mislead, when there's miles between
But I'm safe inside this rocky ride

I wait and see, we feel we're free
The way we need, we try
We hear what we want
We say the things we wish we'd done
Before it's too late and we fade away

I'm ready for another wave
And another way to reach through to your side
And from the outside looking in
It's a crazy race to see who'll travel wide
Verify your feelings for me, I need them to see
Two souls passing by in destiny
I don't wanna pretend that I see no end
Solidify these temporary highs

I wait and see, we feel we're free
The way we need, we try
We hear what we want
We say the things we wish we'd done
Before it's too late and we fade away

I wait and see, we feel we're free
The way we need, we try
We hear what we want
We say the things we wish we'd done
Before it's too late and we fade away

I wait and see
I wait and see
I wait and see
I wait and see

I wait and see, we feel we're free
The way we need, we try
We hear what we want
We say the things we wish we'd done
Before it's too late and we fade away

I wait and see, we feel we're free
The way we need, we try
We hear what we want
We say the things we wish we'd done
Before it's too late and we fade away
