

## Night

Flipp Dinero

The pain we face in life hurt, hurt  
The pain we face in life hurt, hurt  
And change for things which burn  
If I told you that I love yeah just know that our love is a war  
And if you told me that you love me yeah just know that our love is deserved  
The pain we face in life hurts  
And change for things which breaks and burns

Drip from my six import not leaving my car, yeah  
Smokin' real dope, yeah shit is real dope nigga  
I had no hope now I'm all up on Mars  
Now my life fan out, cop when I spend out  
Rollie goes in when I'm all in my car  
How could I win, I was prayin' life end, I was callin' that wind, now they call me young star  
I play life till it's my part, yeah  
I play life till my life part  
I count guap till my life end then I swear to my day that's why I go hard  
I preach but it under my sins yeah I angle my pent wonder why I go hard  
In fact yeah it wasn't that simple, I splurge on my kinfolk and then I go hard, yeah  
A guala with the chains doing things you won't do  
Caught up in the fame and they got me goin' loose  
Mounting up this change yeah the money I can't lose it  
Feelings of the pain yes I'm balling with the fusion  
Imagine you're a slave what I want is an illusion  
I been in this game and the shit was a confusion  
Money and the chains I had case with a conclusion  
The thirty finna pay once you tell me what you're choosin'  
Shit ain't been the same since my life in all gold  
Image of the chains and I'm calling my bros  
Niggas say my name that's wherever I go  
Niggas say my name but they lookin' like foes  
I be on them prayin' when a nigga feel like losing  
Lie one on the end when I feel like Ima lose it  
Infauated with pain I be loving what they sayin'  
Every time I hear my name I get some money for my bruises, yeah

If I told you that I love yeah just know that our love is a war  
And if you told me that you love me yeah just know that our love is deserved  
The pain we face in life hurts  
And change for things which breaks and burns  
Yeah, Yeah, Yeah, Yeah
