

Come Undone

Flipsyde

And I came undone so I walked away
It caught me when I just wasn't looking
And it feels the same day to day
Tryna find my way through the jungle
Now take your heart and beat it down
Bless your soul if you'll live tomorrow
'Cause it's midnight, the whole block's on fire
Said I'm coming up quick and I'm gon' get high, yeah
So high, so high
I don't see myself coming down
No time tonight
Checking out the clouds that I found
I never thought the world would look so bright
From this view, yeah (from this view)
I wanna just curl up all night next to you

And I came undone so I walked away
It caught me when I just wasn't looking
And it feels the same day to day
Tryna find my way through the jungle
Now take your heart and beat it down
Bless your soul if you'll live tomorrow
'Cause it's midnight, the whole block's on fire
Said I'm coming up quick and I'm gon' get high, yeah

[?] I think about the year now
And what I'm doing here, been tryna live my spirit out
Tryna make it through the waters like a little trout
Life is beautiful and beauty's what I'm all about
One love, one glove, five fingers rolling up one fist
Cradling the drink, uh, they're rolling up one split
I'ma stand up on my toes, get a cloud to kiss
Look under the skirt of the earth and insert my wish
We been fucking it for too long, she getting weak
And the greedy dick is too strong, she getting beat
I'ma lover her like a mother, why you think that never
And I'ma beat you like a brother when you act like others

And I came undone so I walked away
It caught me when I just wasn't looking
And it feels the same day to day
Tryna find my way through the jungle
Now take your heart and beat it down
Bless your soul if you'll live tomorrow
'Cause it's midnight, the whole block's on fire
Said I'm coming up quick and I'm gon' get high, yeah

How could I get tripped up on the ground like a worm? ([?] telling me nothing)
Crawling for every inch of life that I have earned ([?] telling me nothing)
There ain't nobody lies to me, babe, [?] telling me nothing
If they'd rather see me on my knees and fall over
'Cause I never thought the world would look so bright from this view, yeah (from this view)
I wanna just curl up all night next to you

And I came undone so I walked away

It caught me when I just wasn't looking
And it feels the same day to day
Tryna find my way through the jungle
Now take your heart and beat it down
Bless your soul if you'll live tomorrow
'Cause it's midnight, the whole block's on fire
Said I'm coming up quick and I'm gon' get high, yeah
