

Moon Rocks

flipturn

Break through for you
Tastes like something new
You might stop to face this wonder
Moon rocks, taking off
State the obvious
We've been breathing in
And breathing out
Breathe it out

Oh, and burn bright, porch light
Watch that shit ignite
We might fly to Costa Rica
To good friends, dead ends
Like this oxygen
We've been breathing in

Breathe it out
Breathe it out
Breathe it out

You know that I've been meaning to
Come and talk to you
Now that we've left the ground
If you need the altitude
To prove to you the sky's still blue
I'd never hold you down
Just breathe out

Breathe it out
Breathe it out
Breathe it out

Break through for you
Looks like you knew
Every question, every answer
Turns out it's just loud
Turns out it's just clouds
We've been breathing in and breathing
